City of Edmonton
Property Assessment User Analysis

As of October 12th, 2026 :

Property Assessment Data ~ 20% download

Property Information ~ 10% download

Property Assessment Data (Current Calendar Year) | Edmonton - Open Data Portal
Property Information (Current Calendar Year) | Edmonton - Open Data Portal

Target Users:

Business owners

Home owners

Prospective Home/Business owners

Due to having over 80% viewership with no downloads, most of the user base could be attributed to “window shopping” or a baseline interest/need

Data analysts were considered, but their user percentage would be under 20% and could be under 10%

Expected questions:

What is the value/condition of my property?

What are all the commercial properties in a given neighborhood/ward?

What is the range of assessed property values in one/all residential neighborhoods?

Expected Benefit:

To let homeowners easily assess their property

Allow business owners/potential business owners to see the value of commercial properties in a given district

To let potential homeowners get an understanding of different neighborhoods, to see if there is one they should look into further
